

Instruction to RO's

Nr 2. Authorization for non-convention surveys based on art. 3.9 of the agreement of 001/2012

Date entry into force: 01 September 2017

By agreement of June 13th 2012 the Maritime Authority of Curaçao has permanently authorized the recognized organizations (RO's) that are party to this agreement to carry out certain surveys and issue certain certificates (see annex I to the agreement and the appendix for a complete list) based on the International Conventions. According to the afore-mentioned agreement the authorization enters into force on January 1st 2013.

In addition to that authorization and under article 3.9 of the agreement, the MAC will authorize the RO's in question to perform on existing ships all non-convention surveys related to radio installations, safety equipment, load-line, pollution prevention, and declarations when mutually agreed on a case by case basis according to the Kingdom's "Safety Regulations for seagoing ships" with the implementation of all the codes hereunder.

Instructions with regard to these surveys will be summarized on the website www.maritimecuracao.org during the course of 2017.

For new-building ships all non-convention surveys will be carried out by MAC or, according to article 3.9 of the agreement, by the RO when mutually agreed on a case by case basis.
